

YEARBOOK 2017

The **TUNED project** (TUNisian Network for Employability and Development of graduates' skills) has been selected by the Education, Audiovisual and Culture Executive Agency (EACEA) of the European Commission for co-funding in the framework of the **Erasmus+ programme, Key Action 2 - Cooperation for innovation and the exchange of good practices, Capacity Building in the field of Higher Education**.

The project **started in October 2016 and will end in October 2019**.

It is **coordinated by the AlmaLaurea Interuniversity Consortium**, involves **8 Tunisian Universities as main beneficiaries** of the European grant, counts on the strong support of the **Tunisian Ministry of Higher Education and Scientific Research** and the collaboration of **4 higher education institutions from Cyprus, Italy and Spain**.

It is a **structural project aiming at supporting the ongoing reform of the higher education system in Tunisia, in order to improve the match between universities education and the labour market requirements, enhancing the efficiency of the whole higher education system by a certified system of quality assurance and the monitoring of higher education programmes and graduates**.

The build-up of an integrated demand supply matching model based on the graduates' database (on the model developed in Italy) is designed:

- to collect and analyze data on university and graduates performances (providing reliable, continuous and updated documentation for assessing the HE system at support of the ongoing reform process)
- to facilitate the university-enterprise cooperation (IT based online services are developed and made available to both graduates, and university staff and firms)
- to facilitate the placement of graduates in the labour market (ensuring a better match between education and employment).
- to develop monitoring tools for university/enterprise cooperation
- to improve internal and external efficiency of the higher education system
- to facilitate the orientation and placement of graduates

More information at the project website: www.tuned-project.eu

In this yearbook, the team working on the project for each partner institution.
